CONSTRUCTION

This property has been designed with extreme attention to detail and finish, reflecting a resolutely contemporary, high-end approach. Created by architect Gabriele Rossi, the house combines minimalist design, clean lines and generous volumes, creating a space that is both luminous, functional and

aesthetically pleasing.

The recent construction incorporates noble, durable materials, selected for their quality, elegance and longevity. Large bay windows frame the surrounding greenery and provide abundant natural light, while ensuring that the house blends seamlessly into its surroundings.

The use of a central staircase and elevator harmoniously links the two levels, allowing fluid circulation and convenient access to all rooms. Every space has been designed to maximize comfort, conviviality and privacy, while highlighting the contemporary style of the residence.
